

MANAGEMENT TEAM

The Board of Education recognizes that the quality of the district's schools is in large measure dependent upon securing maximum use of all members of the management team, which consists of the Superintendent of Schools and the administrative staff. The management team concept is recognized as an arrangement for responsible and appropriate involvement of management personnel in decision making. The Board believes the team approach to management best capitalizes upon the joint strength of individual managers and others in cooperative decision making.

The members of the team act in an advisory capacity and participate in decision making when appropriate.

Adoption date: July 9, 2007
